Site Inspection and Evaluation:

- **Action:** A site inspection of the parking area was conducted to assess the extent of the issue and identify specific areas of concern.
- **Findings:**
 - Significant water accumulation in certain sections.
 - Insufficient drainage causing prolonged waterlogging.

Improvement Recommendations:

- **Enhanced Drainage:** Improving drainage systems to prevent water accumulation and facilitate quick runoff.
- **Surface Upgrades:** Resurfacing the parking area with water-resistant materials to reduce mud and slippery conditions.
- **Provision to keep cycles till upgradation to other place:** As the session is on and repair work is not suitable in rainy season. So this will be done later. Students are urged to ensure that their cycles are parked in an orderly manner to avoid obstructing walkways.

The temporary relocation aims to prevent mishaps and provide a safer parking option during adverse weather conditions.
